

## P86 Combined for Greater Value

The P86 is a crossbred paternal boar designed for today's market. This development captures growth, FCR and quality advantages of the P81 and the P26.

The product of Choice Genetics' aggressive quantitative genetics program enhanced by advanced techniques, the P86 brings together valuable traits in a unique and powerful package that focuses on heavier market weights.

Choice Genetics researchers have leveraged lean growth-fueled efficiency and combined it with robustness, durability and quality to establish the P86 terminal sire as an option for pork producers.

### P86 Sired Commercial Animals

Wean-to-Finish Performance*	
Pigs Sold	254,386
Market Weight	▲ 1.58 lbs    ▲ 0.72 kg
FCR	2.58
Marketed, %	90.90
Average Weight	272.16 lbs    123.45 kg
